

# GET READY FOR YOUR TRANSITION TO ELECTRIC VEHICLES.

## 1 INITIATE

### WHY START THE ELECTRIFICATION TRANSITION?

- Electric vehicles are affordable, with renewable fuel sources and lower maintenance needs
- Combustion engine restrictions will continue to increase, limiting access to some markets
- Decentralized generation enables you to produce your own energy
- Corporate sustainability goals are greatly accelerated with a cohesive EV strategy

## 2 PARTNER

### WHO WILL HELP ME GET EV-READY NOW?

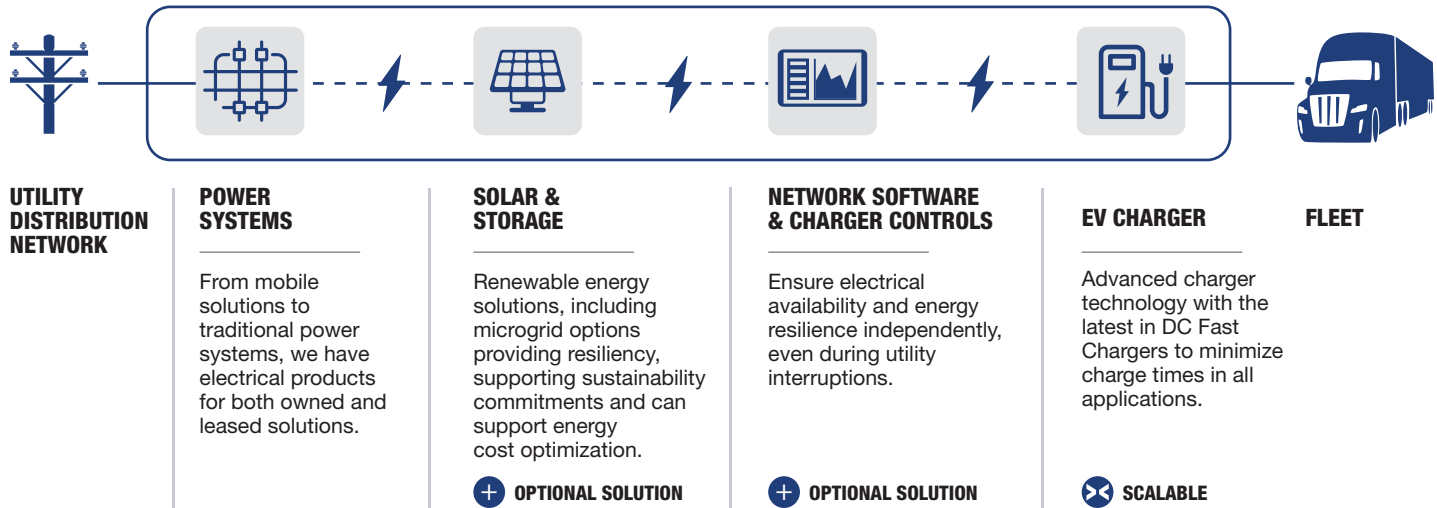

PacLease recommends **Faith Technologies** to lead the integration between PACCAR trucks, charger hardware and network software for seamless installation and commissioning due to nationwide expertise, negotiated costs and warranty coverage.

## 3 SOLUTION

### HOW DO I GROW WITH THE DEMANDS OF THE FUTURE?

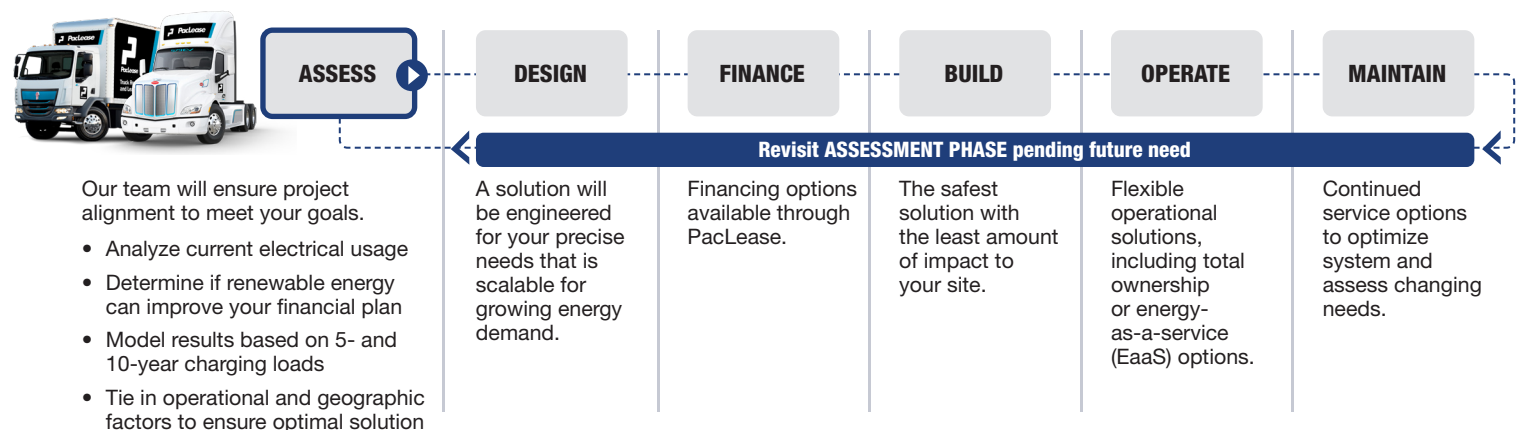

Choosing scalable solutions designed and engineered by experts **Faith Technologies** and **Schneider Electric** enables you to scale your infrastructure as demands evolve.

# 1 Understanding EV Infrastructure

## 2 Getting EV Ready is a Step-By-Step Process

There's more to EV infrastructure than just installing a charging station. Following a proven process allows for identification of the most affordable and scalable deployment strategy for your business.

## 3 The Perfect Partnership

As chosen PacLease partners, Faith Technologies and Schneider Electric will deliver the highest quality, scalable and innovative EV infrastructure.

A comprehensive authority in electrical and energy services, leading change through technology, strategic project consulting and process engineering to drive productivity, value and safety.

World-leading energy technologies, real-time automation, software and services creating integrated solutions for homes, buildings, data centers, infrastructure and industries.
